

## **OPPORTUNITY AT A DISRUPTIVE DANISH STARTUP**

The team behind Kickstoro.com is starting a disruptive new startup aimed at solving the “Social Discovery” problem. You have an exciting opportunity to work with & learn from a team that has been a part of Local (Plan9 / Lahore) & International technology Incubators (Accelerace.dk / Denmark). We have some exciting engineering challenges, and would love your help.

### **This summer, you will:**

Join our product development team in Lahore to solve an exciting problem. You will bring a product to life, gain exposure and benefit from an incredible opportunity to grow with a global team.

### **Looking for someone:**

- passionate about technology, entrepreneurship, and considering a career in computers science or Engineering
- who can solve challenging problems, make a real impact, and build something big
- ranked amongst top 10% in core programming skills such as Java, C/C++
- has exposure to the web development stack (php, mysql, NodeJS)
- willing to learn and experiment

Job Location: **Lahore**

Position: **Software Engineering - Intern**

Experience: **Web-Development, php, mysql, NodeJS, XMPP, IRC, Linux**

Degree requirements: **Computer Science / Computer Engineering. Students and recent graduates**

**If this sounds like you, or one of your batchmates, please send the following**
